

YUFENG HENGDA

INDUSTRIES LIMITED

RECYCLING & METAL-PROCESSING MACHINERY

Recycling Machinery for Scrap Yards, Foundries & Metal Processing Plants

Yufeng Hengda Industries Limited designs recycling and metal-processing machinery and builds it through established manufacturing partners in China. We engineer each machine around the buyer's material and capacity, and deliver fully specified equipment — with technical documentation and worldwide delivery — to scrap yards, recycling plants and foundries.

MACHINERY CATEGORIES

■ Hydraulic Scrap Balers

Compress loose metal scrap into dense, uniform bales for aluminium, steel, copper, brass and mixed non-ferrous material. Available in a range of pressing forces and chamber sizes.

■ Metal Shredders

Single-shaft, double-shaft and heavy-duty shredders for size reduction of aluminium profiles, brass scrap, light steel, radiators and mixed scrap.

■ Container Shears

Cut heavy and long scrap into furnace-ready sizes using a loading box / container feed. Suited to scrap yards handling HMS, steel scrap and mixed heavy scrap.

■ Vertical Shears

Q91-series vertical scrap shears (e.g. Q91-800, Q91-1000) for cutting and preparing steel, aluminium and mixed metal scrap in recycling yards.

■ Slag Crushers

Crush slag and metal-bearing waste for foundries, steel plants and recycling operations, with crushing, screening and metal recovery support.

APPLICATIONS SERVED

Scrap yards • Aluminium recycling • Steel scrap processing • Copper & brass recycling • Foundries & metal recovery

Request a Machinery Quotation

Send us your material type, capacity requirement and destination country and our team will help you identify suitable machinery options and prepare a quotation.
